Eilif Sund, Legal Advisor

During the month of July, 2011, a total of 64 three-spined stickleback (*Gasterosteus aculeatus*) were captured from the waterfront in the Varangerfjord area (Nesseby, 70.147128; 28.873100) for scientific research. All specimens were collected with a seine net in and in accordance with fishery regulations of § 11 in the Royal Decree of 30th of March 2001 No 12., with permission issued on 22nd of July 2011 (ref. 11/8344).
