

## Attachment 1

### WORKING AREAS DURING CRUISE HEINCKE 373:

Requested working areas in the Norwegian EEZ are the Sleipner and the Tommeliten areas. The main working area will be the carbon capture and storage (CCS) site at Sleipner. Tommeliten is a methane seep, which could be explored as a reference site.

### Coordinates of potential wells at Sleipner:

15/9-11: 58°24.012'N / 1°53.604'E

15/9-16: 58°22.128'N / 1°52.623'E

15/7-02: 58°28.401'N / 2°01.952'E

### Coordinates of requested working area at Tommeliten:

56°18'N 2°48'E

56°18'N 3°15'E

56°33.6'N 3°15'E

56°33.6'N 2°48'E
