### Concerning 0.4: Specification of working areas

The entire study area is given in the map above (thick black box) and covers the waters around the Svalbard Archipelago: N80°00 000°00, N81°00 E035°00, N74°00 E035°00, N74°00 E010°00. In addition to the open-water stations, we kindly request to work in nearshore waters including some fjords. Areas of specific interest are the Sörkappbanken
